2. Product Overview

Front panel   Side panel (while the door is open)   Schematic Drawing of Control Panel

#	1	2	3	4	5	6	7
Part Name	door sheet	electronic keypad	Emergency keyhole	Trade marker	External power jack	Body	reset passcode button

#	8	9	10	11	12	13	14
Part Name	back cover	battery compartment	handle	green light	red light	yellow light	button
3. Opening your safe for the first time

Remove the emergency lock cover to expose the lock, insert your emergency key and turn it clockwise, then turn the knob clockwise to open the door.

Special caution: Please do not put the emergency keys inside the safe, and always store it elsewhere safe, so that you can use them to open your safe if battery used up or the product malfunctions.

4. Installing the batteries (You are required to use alkaline battery)

1. Open the battery compartment and insert 4 AA batteries, ensuring that the batteries match the + and - in the compartment. Once powered on, your safe will emit a single beep and the yellow light will flash indicating it's connected to power;

2. Input the factory default password "12345678" and press the "#" button to confirm. The green light will turn on after the yellow light blinks twice, then rotate the handle clockwise to open the door within 6 seconds;

3. The yellow light blinks every time you hit a button;

4. On the keypad panel, "#" is the Confirmation button and "*" is the Delete button. If you entered a wrong passcode, please press "*" to delete your input and re-enter your passcode;

8. The safe will go into Sleep mode if you press a key for more than 20 seconds without any subsequent input;

9. All operation will be terminated when the safe is in Sleep mode, you may press any key to wake the safe up and operate directly.

5. Setting the passcode

The default password "12345678". For security of your property, you will need to change the preset code before use.

1. Input the factory default passcode "12345678" and press the "#" button to confirm. Then the green light shall turn on and the door will be opened, please set your new passcode within 25 seconds after the green light goes out;

2. Press the Reset button at the inner hinge side of the door, and the yellow light shall flash twice and then stay on. Input a passcode of 1 to 8 digits and press the "#" button to confirm.

Tips: When you are done setting your passcode, please try the new code to make sure it works.

6. Opening and closing the door

Closing the safe: Close the door, then turn the knob counterclockwise to lock it.

Opening the safe: Input your passcode and press the "#" button to confirm, yellow light will flash twice with 2 beeps.

7. Alarm function

1. If the passcode is wrongly input, yellow light will flash with buzzer beeps after you press the "#" button to confirm. If an incorrect passcode is entered three times, an alarm will be triggered and last for 1 minute;

2. How to set the alarm: Press the "#" button, and yellow light will flash twice with buzzer beeps, indicating that the system is armed. In case the safe is shaken by external forces, an alarm will be triggered and last for 1 minute.

Note: The alarm will be stopped and the vibration alarm mode will be turned off when you input the correct passcode or fingerprint.

8. Replacing the batteries

When you input your passcode, both the green and red lights are on at the same time indicating the battery is low. Please replace the batteries in time to ensure your regular use.
9. Opening your safe with the emergency key

1. If you cannot operate the safe when the batteries are dead, please use an external battery compartment. Put the plug of an external battery compartment into the power socket on the bottom panel, then input your correct passcode to open the door.

2. Unlock your safe with your master key in case passcode forgot or failure of electronic system. Unlock your safe the way you open it for the first time.

10. Precautions for use

1. Do not put the user manual, master keys and emergency keys and battery compartment inside the safe, and please keep them in another secure place.

2. To prevent battery leakage from damaging the electrical system, do remove batteries from the safe if it will be unused for extended periods of time.

3. For safety reasons, be sure to mount your safe to a solid concrete wall;

4. Do not store excess cash and valuables if the safe is unattended or placed without any remote alarm.

Installation Diagram

11. Troubleshooting
